

I'm not after just a job — I'm after the one that fits: a small, product-obsessed team where an engineer owns things end to end and craft gets noticed. Lately that means putting AI and automation to work deleting the busywork, so the team spends its hours on the parts that actually matter.

01 Experience

Casper — Software Engineer

Remote

Apr 2022 – Present · 4 yrs

- Most senior full-time engineer on the team — stayed through the lean years on conviction and grew with the company through its acquisition.
- Re-platformed the storefront CMS from Contentful to Shopify, and **automated the migration** with custom scripts that moved thousands of entries with zero manual re-entry.
- Built **AI-assisted tooling** to draft and QA marketing-page copy and metadata, cutting content turnaround with product and design.
- Set up CI/CD in GitHub Actions to automate testing and deploys; lifted the site's Lighthouse performance score from the 20s into the 90s.

Myxx — Lead Software Engineer

Remote

May 2021 – Mar 2022

- Rebuilt legacy products for up to 7× performance gains across 10k+ monthly users.
- Automated internal data and reporting pipelines, replacing manual spreadsheet work for the team.
- Led product and engineering meetings; managed third-party engineering teams and data scientists. Built with Next.js / Nest.js, React, Redux, GraphQL, and MongoDB.

Nobos — Co-founder & Full-stack Engineer

New York · Y Combinator finalist

Mar 2019 – Jun 2020

- Designed and built the V1 platform front to back, and raised early funding as a YC finalist.
- Pivoted from retail shelf-space rental into a hospitality marketplace connecting emerging food brands with buyers — grew GMV past \$40k with 80 brands, 50+ purchasers, and 150+ hotels onboarded.

Recruitifi — QA Automation Engineer

New York

2019

- Stood up automated unit, integration, and e2e testing from scratch with RSpec, Jest, and Cypress — and taught the team TDD.

02 Toolkit

Engineering JavaScript · TypeScript · React · Next.js · Nest.js · Redux · Node · Ruby on Rails · Python · GraphQL · Postgres · MongoDB · React Native · SASS / CSS · Git

AI & automation OpenAI & Claude APIs · LLM app integration · prompt & agent workflows · GitHub Actions · Zapier / n8n · scripting

04 My colors

Trained for professional golf and still hit it 300+ yards. Slow-smoke the *best ribs ever*, brew coffee like it matters, and stay honest with calisthenics. Behind a camera for videography, out for camping, and teaching Sunday school. A devoted dog dad. The people who fit me will recognize that the same patience shows up in the code.

03 Education

App Academy

Full-stack Engineering · NYC, 2018

1000+ immersive hours · sub-3% acceptance

Campbell University

PGA Golf Management · 2009–2013

\$36k scholarship · coached by David Orr
